Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Mr. Sheehan was interested in a clarification of the rejection of the claims in terms of the prior art of record, Carini. Mr. Rutten explained that the term "mobile data model" was broad and allowed Carini's replication database as well as "snapshot" tables to be interpreted as providing a mobile data model. Mr. Sheehan was interested in differentiating the claims from Carini, but Mr. Rutten was unable to give a definitive response regarding an amendment to the claims that would provide novel or nonobvious limitations without a new search of the prior art. Mr. Rutten noticed that claim 35 provided potential, but further suggested that clarification regarding the term "mobile data model" would be helpful, as would persuasive arguments explaining why the claims should be allowed.
